

# P553-TS

## 55" Large-Format Touch Display

This 55" touch screen can operate 24/7 due to its internal and external design. Internally, the display features advanced thermal management capabilities as well as self-diagnosis tools and fan technology. Externally, the display claims a sealed industrial strength premium grade panel design, meaning that this display can be mounted in even the most heavily trafficked areas. Further, the unit now features internal touch connectivity with the OPS computer (optional), along with greatly improved cable management to external PC connections to improve ease of deployment.

### AT A GLANCE

- 24/7 operation
- Slim depth
- 4000:1 contrast ratio
- Industrial strength design

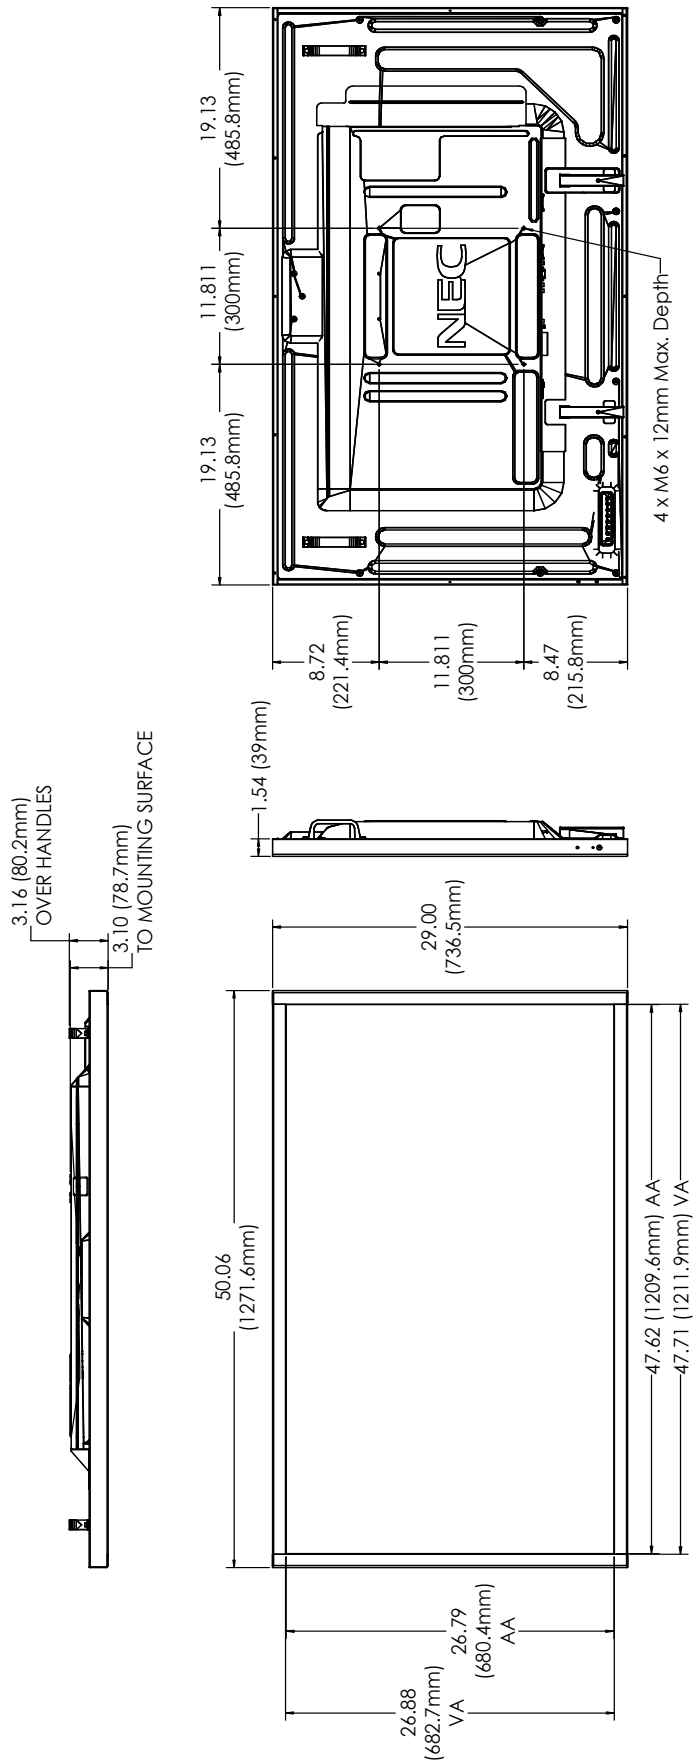

### APPLICATIONS

- QSR
- Airports
- Public spaces
- Medical

### Specifications

|                                       |                                                          |
|---------------------------------------|----------------------------------------------------------|
| Viewable Image Size                   | 55"                                                      |
| Touch Technology                      | Infrared 6 point                                         |
| Pixel Pitch                           | .63 mm                                                   |
| Brightness                            | 550 cd/m <sup>2</sup> Typ / 700 cd/m <sup>2</sup> Max    |
| Contrast Ratio                        | 4000:1                                                   |
| Resolution                            | 1920 x 1080                                              |
| Response Time                         | 8 ms                                                     |
| Viewing Angle                         | 178° Vertical, 178° Horizontal                           |
| Aspect Ratio                          | 16:9                                                     |
| Compatibility                         | PC and Mac                                               |
